[Why Thomas?](#)

I like to work with a local company to supply materials to a local job. Any questions or queries it's good to know that they are on hand.

Could the client spare a few words on how great you are to work with?

The building materials are of a high standard, the steelwork is high quality which is what we expect.

I find the sales team good to deal with, I usually work the same sales person providing continuity in our relationship and understanding how we work.
